

## Što imamo instalirano na računalu?

Ukoliko netko od vas zatraži podatak o instaliranoj programskoj opremi (*software*) na vašem računalu, vjerojatno bi većina pohitala i potražila aplikaciju koja to može učiniti skeniranjem računala. Većina ne zna da se to može vrlo jednostavno učiniti koristeći Windows PowerShell.

Otvorimo PowerShell te ukucajmo slijedeću naredbu:

```
Get-WmiObject -Class Win32_Product | Select-Object -Property Name
```

Dobijemo kompletan ispis instaliranog softwarea.

```
Windows PowerShell
PS C:\Users\isokac.IGI> Get-WmiObject -Class Win32_Product | Select-Object -Property Name
Name
----

VMware vSphere Client 5.1
Waterfox
```

Vjerovatno želimo listu prebaciti u neku tekstualnu datoteku. To možemo dobiti koristeći ovu naredbu.

```
Get-WmiObject -Class Win32_Product | Select-Object -Property Name > C:\Software\instalirano.txt
```

Instalirano.txt označava datoteku u koju će se ispisati sav instaliran software, također možete prilagoditi putanju prema vlastitim željama.

```
