

## Proгноza vremena iz naredbenog retka

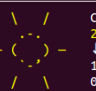

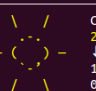

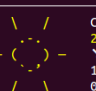

Podatke o vremenu lako možemo dobiti iz raznih programa, widgeta ili pronaći na webu, ali ponekad ih je zgodno dobiti u naredbenom retku (primjerice, ako imate opremu na izdvojenoj lokaciji). Na ovaj način je lakše prenijeti podatke u skriptu, jer nema potrebe za stripanjem HTML-a.

Izdvojili smo dva servisa. Jedan je **wtrr.in**, i koristi se bez specijalnih alata, dovoljan je samo standardni "**curl**", primjerice:

```
$ curl wtrr.in/split
```

```
# curl wtrr.in/split
Weather for City: Split, Croatia
```

U izlazu ćemo dobiti podatke o vremenu za tri dana. Ispis je u boji, pa je u ovom slučaju malo teže dobiti izlaz koji možemo upotrijebiti u nekakvoj skripti.

Zanimljivost je da možete vidjeti i mjesečevu fazu, odnosno mijenu:

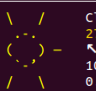

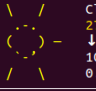

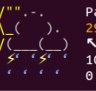

Trenutno vrijeme možete saznati i preko kodova za zračne luke (format IATA):

Ime	IATA	ICAO	Grad
Dubrovnik	DBV	LDDU	Dubrovnik
Lošinj Island	LSZ	LDLO	Lošinj
Osijek	OSI	LDOS	Osijek
Pula	PUY	LDPL	Pula
Rijeka	RJK	LDRI	Rijeka
Bol	BWK	LDSB	Bra? Island
Split	SPU	LDSP	Split
Zagreb	ZAG	LDZA	Zagreb
Zemunik	ZAD	LDZD	Zadar

U ovom primjeru, pogledajmo podatke o vremenu sa osječkog aerodroma (kod je OSI):

```
# curl wtrr.in/OSI
```

```
# curl wtr.in/OSI
Weather for IATA: osi, Osijek Airport, Croatia
```

vremenu specifično za pojedine aerodrome. On podržava mnogo više aerodroma, pa će možda biti zanimljiv onima koji su blizu nekog manjeg aerodroma. Program se zove "weather-util" i instalira se s apt-get:

```
# apt-get install weather-util

Korištenje je jednostavno, no treba znati ICAO kodove, pa ih donosimo sve:

Na žalost, neki ne vraćaju podatke o vremenu, pa to imajte na umu.

```
$ weather LDZA
Searching via station...
[ caching result Zagreb / Pleso, Croatia ]
Current conditions at Zagreb / Pleso, Croatia (LDZA) 45-44N 016-04E 107M
Last updated Jun 30, 2016 - 07:00 AM EDT / 2016.06.30 1100 UTC
  Temperature: 82 F (28 C)
  Relative Humidity: 45%
  Wind: from the SSE (150 degrees) at 6 MPH (5 KT) (direction variable)
```

Postoji i neznatno kraća verzija, pogodnija ako ćete izvlačiti podatke za skriptu ili slično.

```
$ weather -q LDZA
Searching via station...
[ caching result Zagreb / Pleso, Croatia ]
Temperature: 82 F (28 C)
Relative Humidity: 45%
Wind: from the SSE (150 degrees) at 6 MPH (5 KT) (direction variable)
```

Sam program "weather" ima još opcija, a od zanimljivijih možemo spomenuti upozorenja o tornadima i drugim vremenskim nepogodama, no vjerujemo da će vam te informacije prije doći preko TV-a i radija (a i fali nam nešto tornada i uragana na ovim područjima).

Weather cachira podatke, pa se prilikom ponovnog poziva unutar određenog vremenskog razdoblja prikazuju podaci iz cachea. Ukoliko želite svježije podatke, upotrijebite opciju "--no-cache":

```
$ weather -q --no-cache LDDU
Searching via station...
[ using result Dubrovnik / Cilipi, Croatia ]
Temperature: 82 F (28 C)
Relative Humidity: 48%
Wind: from the SW (220 degrees) at 8 MPH (7 KT) (direction variable)
```

Na kraju, moramo spomenuti da i weather, kao i wttr.in, podržava pretraživanje po imenu grada:

```
$ weather rijeka
Searching via name...
[ using result Rijeka / Omisalj, Croatia ]
Current conditions at Rijeka / Omisalj, Croatia (LDRI) 45-13N 014-35E
Last updated Jun 30, 2016 - 07:30 AM EDT / 2016.06.30 1130 UTC
  Temperature: 82 F (28 C)
```

Relative Humidity: 51%  
Wind: from the WNW (300 degrees)

Nažalost, nama se čini da je takvo pretraživanje dosta sporo (oko 35 sekundi), pa smo radije koristili oznake aerodroma (oko 7 sekundi).

```
$ time weather -q --no-cache dubrovnik  
real    0m34.817s
```

```
$ time weather -q --no-cache LDDU  
real    0m6.687s
```
