# Ispis paketa po veličini

**naredba:** dpkg-query/aptitude show

Kad ponestane prostora na disku zgodno je moći saznati koliko pojedini paket zauzima prostora (zbog potencijalnog brisanja). Pronašli smo skriptu koja na čak četiri načina prikazuje koji paketi zauzimaju najviše mjesta (link: https://ubuntuforums.org/showthread.php?t=599424 [1]).

```
#!/bin/bash
if [ $# -ne 1 ]
then
        echo "usage : $0 <0/1/2/3>"
        exit 0
fi

if [ $1 -eq 0 ]
then
 aptitude show '~n.*' | awk '\
 /^Package:/ {p = $0};\
 /^State:/ {s = $0};\
 /^Uncompressed Size:/ {print p " " s " " $0};\
 ' | grep 'State: installed' | sed 's/: /:/g' | sort -t: -n -k4 | more
fi

if [ $1 -eq 1 ]
then
 dpkg-query -W --showformat='${Installed-Size;10}\t${Package}\n' | sort -k1,1n
fi

if [ $1 -eq 2 ]
then
 dpkg-query --show --showformat='${Package;-50}\t${Installed-Size}\n' | sort -k 2 -n
fi

if [ $1 -eq 3 ]
then
 dpkg-query --show --showformat='${Package;-50}\t${Installed-
Size} ${Status}\n' | sort -k 2 -n |grep -v deinstall
fi
```
