

Ne radi spamassassin u distribuciji jessie?

Česti korisnik sys.helpa D.M. ima problem nakon prelaska na distribuciju jessie. Radi se o tome da spamovi koji su trebali biti zaustavljeni bez problema prolaze do korisnika. Čak ni stavljanje tih spamerskih adresa u crnu listu s direktivom "blacklist_from" ne pomaže. U logovima je mogao uočiti sljedeće:

```
warn: Use of uninitialized value $type in numeric eq (==) at /usr/share/perl5/Mail/SpamAssassin/Conf/Parser.pm line 671.
warn: Use of uninitialized value $type in numeric eq (==) at /usr/share/perl5/Mail/SpamAssassin/Conf/Parser.pm line 674.
warn: Use of uninitialized value $type in numeric eq (==) at /usr/share/perl5/Mail/SpamAssassin/Conf/Parser.pm line 677.
warn: Use of uninitialized value $type in numeric eq (==) at /usr/share/perl5/Mail/SpamAssassin/Conf/Parser.pm line 680.
...
warn: Use of uninitialized value $type in numeric eq (==) at /usr/share/perl5/Mail/SpamAssassin/Conf/Parser.pm line 698.
warn: Use of uninitialized value $type in concatenation (.) or string at /usr/share/perl5/Mail/SpamAssassin/Conf/Parser.pm line 702.
warn: config: unknown conf type ! at /usr/share/perl5/Mail/SpamAssassin/Conf/Parser.pm line 702.
```

Problem je ovaj put najobičnija greška (*typo*) u datoteci `/usr/share/perl5/Mail/SpamAssassin/Plugin/Razor2.pm` u retku 118:

```
type => $Mail::SpamAssassin::Conf::CONF_TYPE_DURATIION,
```

treba biti

```
type => $Mail::SpamAssassin::Conf::CONF_TYPE_DURATION,
```

Nakon što obrišete slovo "I" viška, sve će proraditi kako treba. Ova je greška uočena još 2014., ali do danas nije ispravljena. Više o tome na Apachejevom bug trackeru:
