

CARNetovi programski paketi

Na ovim stranicama možete pronaći informacije vezane za izradu CARNetovih programskih paketa.

Programski paketi su prvenstveno pomoć sistem-inženjerima na ustanovama članicama CARNeta, koji nastoje postojeće složene poslove konfiguracije svesti na jednostavne procedure preuzimanja i instaliranja prilagođenih programskih paketa.

Druga funkcija programskih paketa je pružanje unificiranog skupa mrežnih servisa na razini cijele mreže CARNet, što je osnova za pružanje usluga visoke kvalitete.

Osim same izrade programskih paketa, grupa za izradu programskih paketa djeluje i kao helpdesk za sve probleme proizašle iz uporabe programskih paketa, i to u sklopu [helpdeska za sistem-inženjere](#) [1].

Grupa za izradu paketa prati izdavanje novih izdanja operativnog sustava Debian, te nakon izlaska nove inačice ubrzo objavljuje prilagođene pakete. Njihov popis možete naći ovdje:
