

Popis paketa po datumu instaliranja

naredba: `ls -tl /var/lib/dpkg/info | grep list | less`

Sortiranjem ispisa naredbe **ls** možemo dobiti datume instaliranja paketa, što je ponekad korisno, na primjer kad provjeravamo koji je paket izazvao nekakav problem. Ispis se može malo dotjerati uz pomoć naredbe **awk**:

```
ls -tl /var/lib/dpkg/info | awk '{print $6, $7, $8, $9}' | less
